The Harvard Art Museums' Forbes Pigment Collection Walter Foster Pub

Two Austrian-born designers have left their indelible mark on California's residential architecture of the 1930s to 1960s: Richard Neutra (1892?1970) and Rudolph M. Schindler (1887?1953) combined modern form and inventive construction with new materials to create a truly modern vision of living that remains inspirational to the present day. This new book features twenty famous and lesser known houses from that period, designed by the two pioneers and other architects that were influenced by Neutra's and Schindler's ideas. All are marked by highly economical use and outstanding quality of space, a minimalist aesthetic, and by their ideal adaption to climatic conditions. They are monuments of a period as well as timeless models for contemporary and future architecture. The images by photographer David Schreyer show the buildings in their present state as a commodity of highest quality that can be, and should be, altered to meet today's changed demands to a living space. Andreas Nierhaus's texts, based on interviews, explore the relationship of the present inhabitants to their homes and what they mean to them. Together, the authors offer uniquely intimate insights into a sophisticated way of life still too little known outside California.

A Real World Guide to Using Color in Graphic Design After 8 Books

The daily lives of ordinary people are replete with objects, common things used in commonplace settings. These objects are our constant companions in life. As such, writes Soetsu Yanagi, they should be made with care and built to last, treated with respect and even affection. They should be natural and simple, sturdy and safe - the aesthetic result of wholeheartedly fulfilling utilitarian needs. They should, in short, be things of beauty. In an age of feeble and ugly machine-made things, these essays call for us to deepen and transform our relationship with the objects that surround us. Inspired by the work of the simple, humble craftsmen Yanagi encountered during his lifelong travels through Japan and Korea, they are an earnest defence of modest, honest, handcrafted things - from traditional teacups to jars to cloth and paper. Objects like these exemplify the enduring appeal of simplicity and function: the beauty of everyday things.

THE SUNDAY TIMES BESTSELLER 'A mind-expanding tour of the world without leaving your paintbox. Every colour has a story, and here are some of the most alluring, alarming, and thought-provoking. Very hard painting the hallway magnolia after this inspiring primer.' Simon Garfield *The Secret Lives of Colour* tells the unusual stories of the 75 most fascinating shades, dyes and hues. From blonde to ginger, the brown that changed the way battles were fought to the white that protected against the plague, Picasso's blue period to the charcoal on the cave walls at Lascaux, acid yellow to kelly green, and from scarlet women to imperial purple, these surprising stories run like a bright thread throughout history. In this book Kassia St Clair has turned her lifelong obsession with colours and where they come from (whether Van Gogh's chrome yellow sunflowers or punk's fluorescent pink) into a unique study of human civilisation. Across fashion and politics, art and war, *The Secret Lives of Colour* tell the vivid story of our culture.

A Practical Manual for the Lay Student of Color Penguin UK

A guide to the cultural, historical, and social meanings of twenty-seven colors, plus examples of successful usage of each as well as options for palette variations. The Designer's Dictionary of Color provides an in-depth look at twenty-seven colors key to art and graphic design. Organized by spectrum, in color-by-color sections for easy navigation, this book documents each hue with charts showing color range and palette variations. Chapters detail each color's creative history and cultural associations, with examples of color use that extend from the artistic to the utilitarian--whether the turquoise on a Reid Miles album cover or the avocado paint job on a 1970s Dodge station wagon. A practical and inspirational resource for designers and students alike, *The Designer's Dictionary of Color* opens up the world of color for all those who seek to harness its incredible power.

Interaction of Color ABRAMS

From New York Times best-selling author of the *Dinotopia* series, James Gurney, comes a carefully crafted and researched study on color and light in paintings. This art instruction book will accompany the acclaimed *Imaginative Realism: How to Paint What Doesn't Exist*. James Gurney, New York Times best-selling author and artist of the *Dinotopia* series, follows *Imaginative Realism* with his second art-instruction book, *Color and Light: A Guide for the Realist Painter*. A researched study on two of art's most fundamental themes, *Color and Light* bridges the gap between abstract theory and practical knowledge. Beginning with a survey of underappreciated masters who perfected the use of color and light, the book examines how light reveals form, the properties of color and pigments, and the wide variety of atmospheric effects. Gurney cuts through the confusing and contradictory dogma about color, testing it in the light of science and observation. A glossary, pigment index, and bibliography complete what will ultimately become an indispensable tool for any artist. This book is the second in a series based on his blog, gurneyjourney.com. His first in the series, *Imaginative Realism*, was widely acclaimed in the fantastical art world, and was ranked the #1 Bestseller on the Amazon list for art instruction. "James Gurney's new book, *Color and Light*, cleverly bridges the gap between artistic observation and scientific explanation. Not only does he eloquently describe all the effects of color and light an artist might encounter, but he thrills us with his striking paintings in the process." --Armand Cabrera, Artist
