Active learning is "a method of learning in which students are actively or experientially involved in the learning process and where there are different levels of active learning, depending on student involvement." (Bonwell & Eison 1991) Bonwell & Eison (1991) states that "students participate [in active learning] when they are doing something besides passively listening."

Using Active Learning Instructional Strategies to Create ...

Active Learning: Creating Excitement in the Classroom. 1991 ASHE-ERIC Higher Education Reports. Bonwell, Charles C.; Eison, James A. This monograph examines the nature of active learning at the higher education level, the empirical research on its use, the common obstacles and barriers that give rise to faculty resistance, and how faculty and staff can implement active learning techniques.
