Good local design guides are concise, positive documents which are accessible and use tools such as illustrations and checklists to highlight key design issues and possible solutions. They are most...
Process design - Wikipedia
One of the key purposes of good document design is to help emphasize the parts of a document that you want readers to see the most, or see first. Like alignment, the principle of contrast can help do that. This document uses numbered lists, bolding, and spacing to emphasize the contrast between different parts of the document.

Design document, as how Wikipedia would define it as, is a written text or an illustration that would go together with a computer software.

Either way, it should be able to explain how to use the said computer software as well as how to operate it. This could also mean different things to most people having different roles.
