**The Drug Problem** The New Press

“Irresistible is a fascinating and much needed

exploration of one of the most troubling phenomena of modern times.” —Malcolm Gladwell, author of New York Times bestsellers *David and Goliath* and *Outliers* “One of the most mesmerizing and important books I’ve read in quite some time. Alter brilliantly illuminates the new obsessions that are controlling our lives and offers the tools we need to rescue our businesses, our families, and our sanity.” —Adam Grant, New York Times bestselling author of *Originals* and *Give and Take* Welcome to the age of behavioral addiction—an age in which half of the American population is addicted to at least one behavior. We obsess over our emails, Instagram likes, and Facebook feeds; we binge on TV episodes and YouTube videos; we work longer hours each year; and

---

we spend an average of three hours each day using our smartphones. Half of us would rather suffer a broken bone than a broken phone, and Millennial kids spend so much time in front of screens that they struggle to interact with real, live humans. In this revolutionary book, Adam Alter, a professor of psychology and marketing at NYU, tracks the rise of behavioral addiction, and explains why so many of today's products are irresistible. Though these miraculous products melt the miles that separate people across the globe, their extraordinary and sometimes damaging magnetism is no accident. The companies that design these products tweak them over time until they become almost impossible to resist. By reverse engineering behavioral addiction, Alter

explains how we can harness addictive products for the good—to improve how we communicate with each other, spend and save our money, and set boundaries between work and play—and how we can mitigate their most damaging effects on our well-being, and the health and happiness of our children. Adam Alter's previous book, *Drunk Tank Pink: And Other Unexpected Forces that Shape How We Think, Feel, and Behave* is available in paperback from Penguin. *Effective Alternatives* Univ of California Press A study of the modern drug rehabilitation system follows the struggles of five addicts as they make their way through the complex maze of drug treatment and calls for an integrated approach that treats the root causes of

Database Aesthetics examines the database as cultural and aesthetic form, explaining how artists have participated in network culture by creating data art. The essays in this collection look at how an aesthetic emerges when artists use the vast amounts of available information as their medium. Here, the ways information is ordered and organized become artistic choices, and artists have an essential role in influencing and critiquing the digitization of daily life. After three decades of living in the sandy beach suburbs of Huntington Beach, Jon Vreeland's heroin addiction has finally destroyed his once promising music career, and estranged himself from his wife and his two daughters. Now Vreeland broods his daughter's absence while living in his old tour van that is broken down and parked on Atlanta Avenue, on the brink of downtown Huntington Beach. He and his brand new lover and longtime junkie, Zoey Leigh, live in the van and sell and shoot heroin, move from place to place, shift from crime to crime, rob the undeserving in their brazen attempt to escape their hypodermic reality and themselves. But no matter where

they go or who they stay with, they always circle back to the shores of Huntington Beach, where the dark nights are their lonely playground. But Jon isn't meant for this life--he wants nothing more than to rid himself of this very real nightmare, and return to his estranged family and career. This is the story of how he began to get out.

Homelessness in America [3 volumes] Spinifex Press

One day a teenage boy gets on his bike and rides forty miles up California ' s Pacific Coast

Highway to avoid causing an earthquake he fears will endanger his mother and sister. But the quake he is experiencing is not coming from beneath the earth; it ' s the onset of bipolar illness. Blinded by Hope describes what it ' s like to have an unusually bright, creative child—and then to have that child suddenly be hit with an illness that defies description and cure. Over the years, McGuire attributes her son ' s lost jobs, broken relationships, legal troubles, and periodic hospitalizations to the manic phase of his illness, denying the severity of his growing drug use—but ultimately, she has to face her own addiction to rescuing him, and to forge a path for herself toward acceptance, resilience, and love. A wakeup call about the epidemic of mental illness, substance abuse, and mass incarceration in our society, Blinded by Hope shines a light on the shadow of family dynamics that shame, ignorance, and stigma rarely let the public see, and asks the question: How does a mother cope when love is not

Homelessness is one of the most compelling social

---

problems in the United States. Dating from the early years in Colonial America to the current problems relating to homeless women and children, homelessness has been the topic of discussion of scholars, social activists, and policy makers. Many types of social problems are linked to homelessness, including poverty, substance abuse, foster care, and crime. As a result, unpacking the issues has proven to be a challenge for anyone interested in this topic. Homelessness in America offers an assessment of what is known about each segment of the homeless population, which contrary to conventional belief, is comprised of a wide variety of faces from many backgrounds. It explains linkages to other social issues and provides a balanced

overview of homelessness in light of the varying perspectives on the topic. While much of what has been written about homelessness has come from the academic perspective, agendas often interfere with an accurate understanding of the problem. Clearly, there is a place for other types of perspectives, including those that view homelessness through political and legal lenses. These groups have provided us with a robust body of information within which we may better understand the questions relating to homelessness. McNamara has brought together the voices of these groups in order to reveal the numerous political, economic, and social constraints that beset current attempts to solve homelessness. In addition,

---

the commonly held belief that homelessness is a result of laziness or a poor work ethic is turned on its head to reveal that homelessness is truly a multifaceted and complex issue.

Slaying the Dragon: The History of Addiction Treatment and Recovery in America Penguin
