Small farms once occupied the heights that John
Elder calls home, but now only a few cellar holes
and tumbled stone walls remain among the dense
stands of maple, beech, and hemlocks on these
Vermont hills. Reading the Mountains of Home is a
journey into these verdant reaches where in the last
century humans tried their hand and where bear
and moose now find shelter. As John Elder is our
guide, so Robert Frost is Elder's companion, his
great poem "Directive" seeing us through a
landscape in which nature and literature, loss and
recovery, are inextricably joined. Over the course
of a year, Elder takes us on his hikes through the

forested uplands between South Mountain and North Mountain, reflecting on the forces of nature, from the descent of the glaciers to the rush of the New Haven River, that shaped a plateau for his village of Bristol; and on the human will that denuded and farmed and abandoned the mountains so many years ago. His forays wind through the flinty relics of nineteenth-century homesteads and Abenaki settlements, leading to meditations on both human failure and the possibility for deeper communion with the land and others. An exploration of the body and soul of a place, an interpretive map of its natural and literary life, *Reading the Mountains of Home* strikes a moving balance between the pressures of civilization and the attraction of wilderness. It is a beautiful work of nature writing in which human nature finds its place, where the reader is invited to follow the last line of Frost's "Directive," to "Drink and be whole again beyond confusion."

Jan Friedman's *Eccentric America* proved that the most unlikely events and landmarks could become tourist attractions. This award-winning title is dedicated to the sheer lunacy of California and her citizens, covering the biggest, the best, the wackiest and weirdest of the state's people and places. From art-car and golf-cart parades to the Valentine's Day Sex Tour at the San Francisco Zoo; from a festival that moons Amtrak to a town with its own language; from obsessed collectors of Pez, yo-yos, and bananas to kitschy theme motels and a man who built a three-storey mountain out of hay, adobe, and old paint. *Eccentric California* takes an in-depth look at one very peculiar place.

Some call the imaginal the realm of the archetypes, the home of the gods and goddesses, the land of the daimon, or

the source of creativity. Others simply call it the soul. The daimon of the imaginal world facilitate the incarnation of soul into the physical body, and transforming these dark energies allows us to progress as spiritual beings, to live life from a more conscious view. Sandra Dennis suggests that attitudes devaluing the erotic, feminine, instinctual energies particularly those of sexuality, and destructiveness and the marginalization of bodily sensation itself, block these daimonic soul images from incarnating. She discusses our tendency to block these transforming forces and offers suggestions on how to embrace and reclaim them to allow for a more integrated existence. She explains sensations associated with daimonic imagery fragmentation, rage, anxiety, pain, also the other side ecstasy, bliss, orgasmic release understanding that all of these sensations form the basis for profound change in the sense of self. Ethnography is an increasingly important research method in the private sector, yet ethnographic literature continues to focus on an academic audience. Sam Ladner fills the gap by advancing rigorous ethnographic practice that is tailored to corporate settings where colleagues are not steeped in social theory, research time lines may be days rather than months or years, and research sponsors expect actionable outcomes and recommendations. Ladner provides step-by-step guidance at every turn--covering core methods, research design, using the latest mobile and digital technologies, project and client management, ethics, reporting, and translating your findings into business strategies. This book is the perfect resource for private-sector researchers, designers, and managers seeking robust ethnographic tools or academic researchers hoping to conduct research in corporate settings. This book is an ethnographic account of San Francisco's most inner city neighborhood, the Tenderloin. Using its streets as campus and its people as teachers, Stannard-Friel uses storytelling as a way of explaining why inner city social problems, such as homelessness, drugs, prostitution, untreated mental illness, and death of young people by murders and suicides, exist and persist there. The work delves into who lives in the Tenderloin and why, the role of dedicated service

providers in meeting people's needs and encouraging social change, and what lessons university students, many coming from their own challenging backgrounds, learn through community engagement and service learning that encourage understanding, compassion, and meaningful contributions to society. The work also explores how life in the area is changing, and why so many youth report that they "love living in the Tenderloin."

The Bad Bug Book 2nd Edition, released in 2012, provides current information about the major known agents that cause foodborne illness. Each chapter in this book is about a pathogen—a bacterium, virus, or parasite—or a natural toxin that can contaminate food and cause illness. The book contains scientific and

technical information about the major pathogens that cause these kinds of illnesses. A separate "consumer box" in each chapter provides non-technical information, in everyday language. The boxes describe plainly what can make you sick and, more important, how to prevent it. The information provided in this handbook is abbreviated and general in nature, and is intended for practical use. It is not intended to be a comprehensive scientific or clinical reference. The Bad Bug Book is published by the Center for Food Safety and Applied Nutrition (CFSAN) of the Food and Drug Administration (FDA), U.S. Department of Health and Human Services. Named a Best Book of 2020 by Publisher's Weekly Named a Best Cookbook of 2020 by Amazon and Barnes & Noble "Every elegant page projects Keller's high standard of 'perfect culinary execution'. . . . This superb work is as much philosophical treatise as gorgeous cookbook." —Publishers Weekly, STARRED REVIEW Bound by a common philosophy, linked by live video, staffed by a cadre of inventive and skilled chefs, the kitchens of Thomas Keller's celebrated restaurants—The French Laundry in Yountville, California, and per se, in New York City—are in a relationship unique in the world of fine dining. Ideas bounce back and forth in a dance of creativity, knowledge, innovation, and excellence. It's a relationship that's the

very embodiment of collaboration, and of the whole being greater than the sum of its parts. And all of it is captured in *The French Laundry, Per Se*, with meticulously detailed recipes for 70 beloved dishes, including Smoked Sturgeon Rillettes on an Everything Bagel, "The Whole Bird," Tomato Consommé, Celery Root Pastrami, Steak and Potatoes, Peaches 'n' Cream. Just reading these recipes is a master class in the state of the art of cooking today. We learn to use a dehydrator to intensify the flavor and texture of fruits and vegetables. To make the crunchiest coating with a cornstarch-egg white paste and potato flakes. To limit waste in the kitchen by fermenting vegetable trimmings for sauces with an unexpected depth of flavor. And that essential Keller trait, to take a classic and reinvent it: like the French onion soup, with a mushroom essence stock and garnish of braised beef cheeks and Comté mousse, or a classic crème brûlée reimagined as a rich, creamy ice cream with a crispy sugar tuile to mimic the caramelized coating. Throughout, there are 40 recipes for the basics to elevate our home cooking. Some are old standbys, like the best versions of beurre manié and béchamel, others more unusual, including a ramen broth (aka the Super Stock) and a Blue-Ribbon Pickle. And with its notes on technique, stories about farmers and purveyors, and revelatory essays from Thomas Keller—"The Lessons of a

Dishwasher,” “Inspiration Versus Influence,” “Patience and Persistence”—The French Laundry, Per Se will change how young chefs, determined home cooks, and dedicated food lovers understand and approach their cooking.

Since the early 1990s, federal transportation laws have slowly started

to level the playing field between highway and alternative transportation strategies, as well as between older and newer communities. The Intermodal Surface Transportation Efficiency Act of 1991 and the Transportation Equity Act for the 21st Century made substantial changes in transportation practices. These laws devolved greater responsibility for planning and implementation to urban development organizations and introduced more flexibility in the spending of federal highway and transit funds. They also created a series of special programs to carry out important national objectives, and they tightened the linkages between transportation spending and issues such as metropolitan air quality. Taking the High Road examines the most pressing transportation challenges facing American cities, suburbs, and metropolitan areas. The authors focus on the central issues in the ongoing debate and deliberations about the nation's transportation policy. They go beyond the federal debate, however, to lay out an agenda for reform that

responds directly to those responsible for putting these policies into practice—leaders at the state, metropolitan, and local levels. This book presents public officials with options for reform. Hoping to build upon the progress and momentum of earlier transportation laws, it ensures a better understanding of the problems and provides policymakers, journalists, and the public with a comprehensive guide to the numerous issues that must be addressed. Topics include

- A wide-ranging policy framework that addresses the reauthorization debate
- An examination of transportation finance and how it affects cities and suburbs
- An analysis of metropolitan decisionmaking in transportation
- The challenges of transportation access for working families and the elderly
- The problems of increasing traffic congestion and the lack of adequate alternatives

There are no more cheerleaders in the town of Sunnybrook. First there was the car accident--two girls dead after hitting a tree on a rainy night. Not long after, the murders happened. Those two girls were killed by the man next door. The police shot him, so no one will ever know his reasons. Monica's sister was the last cheerleader to die. After her suicide, Sunnybrook High disbanded the cheer squad. No one wanted to be reminded of the girls they'd lost. That was five years ago. Now the faculty and students at Sunnybrook High want to remember the lost cheerleaders. But for Monica, it's not that easy. She just wants to forget. Only,

Monica's world is starting to unravel. There are the letters in her stepdad's desk, an unearthed, years-old cell phone, a strange new friend at school. . . . Whatever happened five years ago isn't over. Some people in town know more than they're saying. And somehow, Monica is at the center of it all. There are no more cheerleaders in Sunnybrook, but that doesn't mean anyone else is safe.
